

PEACE OF MIND SERVICE

Brrr it is cold out there, winter has taken over. Do you lay awake at night worrying about your hot tub in these cold conditions? Sure, it has operated fine in the past, but what if this year is different? What if it stops running and freezes? That can cost as much as \$3500 to repair! The staff at Combined Pool and Spa understands that concern and we want to help you get a restful night's sleep by offering you our Peace of Mind service.

Did you know that your pump will often give an indicator that it is about to stop working? Our service techs do, and they know how test for such indicators not only on your pump but on every piece of equipment. It is true, problems with a spa can often be avoided with some preventative checks. This is why we want to offer you some "peace of mind" with our 48 point check and 7 point detailing service. During this service we will check all the mechanics of your tub and spruce up its looks as well. We cannot guarantee that nothing will go wrong with your tub following this service, but we can guarantee that we will test every piece of equipment and if anything tests within a questionable range we will notify you of any recommended repairs or replacements. After reviewing your detailed inspection results sheet, you may decide to take a wait see approach but if you want to go ahead our recommendations **we are offering 40% off our standard labor rate and 20% off all parts**. This is just one more way the staff at Combined Pool and Spa is working to ensure your peace of mind and provide you the best possible service.

Tests completed on:

- thermistors/ t-stats
- control panel
